MARKETING STRATEGY | MARKETPLACE GROWTH | CUSTOMER DECISION STRATEGY

PROFESSIONAL PROFILE

Marketing strategy professional with experience connecting SEO/SEM performance, customer search intent, product positioning, and behavioral decision-making. I apply Distinctive Brand Assets, Category Entry Points, mental and physical availability, information asymmetry, loss aversion, bounded rationality, transaction-cost reduction, and decision-threshold analysis to design growth paths that make the next action feel clear, available, and low-risk for customers.

EDUCATION

City University of New York, Baruch College — M.S. in Digital Marketing	May 2026
Missouri State University — Graduate Certificate in Marketing	Aug 2024
Missouri State University — B.S. in Communication Studies	Aug 2022

PROFESSIONAL EXPERIENCE

Marketing Strategy Assistant | DY ENG Gimpo, South Korea | Mar 2026-Present

- Strengthen SEO and SEM strategy through Distinctive Brand Assets and Category Entry Points to support lead generation, conversion improvement, and customer inquiry quality.
- Analyze Naver Search Ads performance across keyword and expanded-search campaigns, including CTR, CPC, search behavior, inquiry potential, and conversion-relevant signals.
- Translate technical B2B products into customer-searchable problem language so prospects can evaluate product fit, feasibility, and next steps under uncertainty.
- Apply information asymmetry, loss aversion, bounded rationality, and transaction-cost thinking to identify decision thresholds before prospects drop off.

Marketing Strategy Intern | DY Engineering Gimpo, South Korea | Feb 2025-Mar 2026

- Analyzed core product DBAs and category positions across ice thermal storage systems, heat exchangers, hot water tanks, and related engineered products.
- Identified narrower entry points where customer demand, competitive gaps, and product fit were clearer than broad generic keyword spaces.
- Supported brand-consistent project development and adjacent-market ideas while reducing internal product-category overlap and cannibalization risk.

Graduate IT Support Assistant | Missouri State University - Computer Services Springfield, MO | Aug 2022-May 2024

- Supported campus users across Windows, Mac, lab software, system updates, and computer equipment in a customer-facing technical environment.
- Diagnosed issues and communicated clearly with students, staff, coworkers, and supervisors to maintain reliable service delivery.

PROJECTS AND RESEARCH

B2B Product Marketing and Search Intent Strategy Portfolio | DY Engineering 2026

- Reframed a search ads performance issue as a product-positioning and availability-design challenge: making complex B2B products easier to find, understand, and evaluate.
- Designed long-tail keyword and category-signal structures around customer problem language; observed daily phone-inquiry conversion above 5% and expanded-search CTR above 3.5% for hot water tanks.
- Used narrow Category Entry Points to reduce information gaps and motivate re-search when customers faced uncertainty among similar industrial suppliers.

Amazon Review Sentiment Analysis | Baruch College - Marketing Analytics New York, NY | 2025

- Applied text mining to identify emotional signals behind consumer judgments, expectation gaps, and message-framing opportunities.

Planet Fitness Market Research | Baruch College - Marketing Research New York, NY | 2025

- Analyzed NYC student motivations and barriers, connecting financial and emotional friction to lower-risk participation paths.

STRATEGIC MARKETING FRAMEWORK

Availability-centered marketing strategy: build mental availability through DBAs, CEPs, and recognizable problem language; build physical availability through clear access, inquiry, and service paths. My lens treats every extra search, comparison, doubt, click, wait, or clarification as a transaction cost. The goal is ethical conversion design: guide customers toward what they already need before bounded rationality reaches its threshold and turns into hesitation, avoidance, or abandonment.
